

PigmentInc[®] for Direct Prints.

The “greener” digital textile printing market for natural fibers is growing faster than ever. Make the switch to a greener solution that requires no water, no pre treat, no steaming or washing in process. The P60i PigmentInc[®] range ensures that you have an ink solution that can deliver the same quality and performance you’ve come to expect from traditional printing techniques. An enhanced 9 color ink range delivers extended colour gamuts, great hand and wash and light fastness to all natural fibers, 100% polyester and blends.

Orange, Grey, Red, Violet, Green and CMYK are available for optimized colour consistency. Designed for continual use in the latest generation hi-speed Epson DX7 print heads.

Our degassed bag system delivers outstanding performance with less clogging and maintenance needs. Available in 1 and 2 liter degassed bags.

Optional Pre-coatings

A range of P60i series pre-coatings are optimised to give best performance with P60i PigmentInc[®] inks on various substrates. Pre-coatings provide exceptional sharpness and higher printable ink limits. The whiteness and the handle of the original fabric is also retained. Two pre-coatings are available for 100% cotton or 100% polyester and blends. Available in 5 and 20 liter containers. A 1.6meter pre treater designed for rolls of fabric is also available.

 Cyan	 Magenta	 Yellow	 Black	 Green
 Orange	 Grey	 Violet	 Red	

Features:

- High dye loading
- 9 colors to choose from
- Bright striking colors
- Suitable for cotton, viscose, silk, wool, linen, polyester & blends
- Excellent jetting performance
- Wide colour gamut
- Excellent end-use properties
